MONITOR INFORMTION
ADJUSTMENTS

select **o**
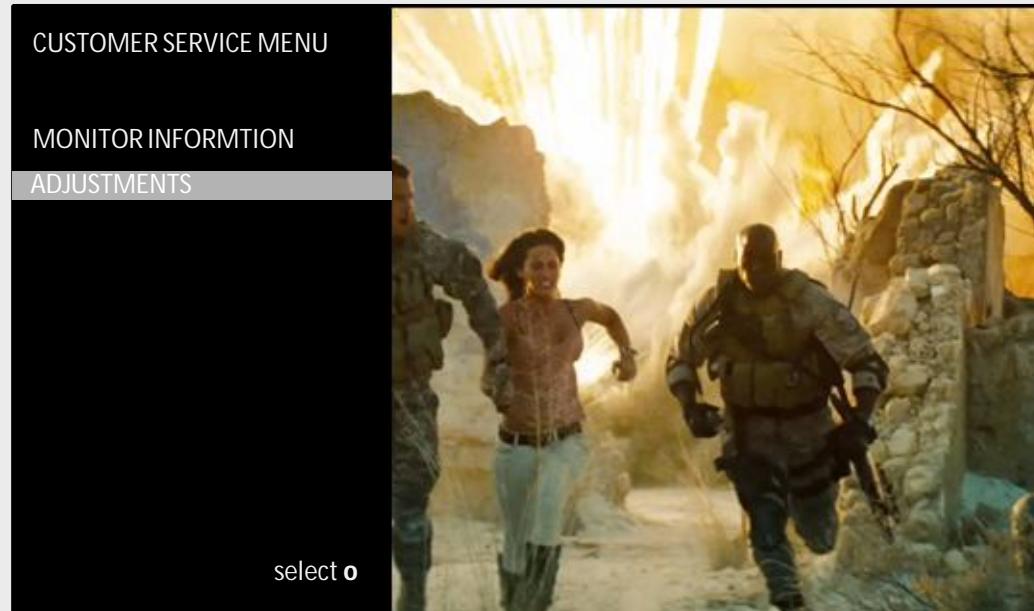

BANG & OLUFSEN

Setting up the Headphone output

- In the ADJUSTMENTS menu move the cursor to HP OUTPUT and use the left or right arrow key to change the setting.

```
ADJUSTMENTS

WSS STATUS          DETECT ON

BLACK BAR DETECTION   ON
FORCED 16:9           OFF
MAX. VOLUME           90
SOUND                 AUTO
SOUND DELAY           100
HP OUTPUT             NORMAL

TELETEXT LANGUAGE     00
FILM MODE             ON
AUTO ST.BY 15 MIN     ON

                store o
```
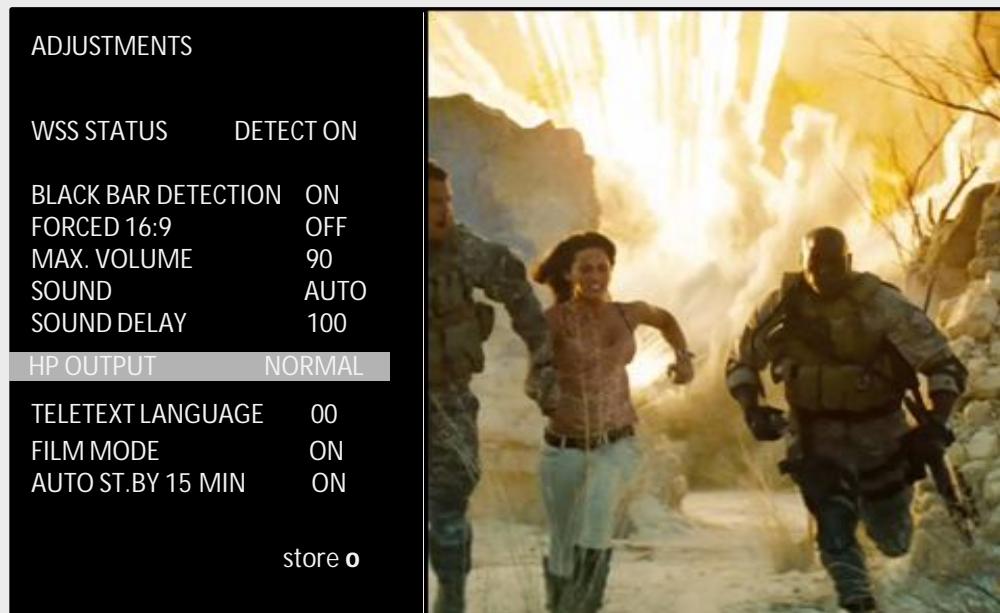

Note: Not all menu items are shown in this picture

- The setting can be set to : NORMAL, FIXED LEVEL or FOLLOW TV.

Setting up the Headphone output

- NORMAL =   Uses the normal volume control with separate volume settings for the TV speaker and the Headphone output.

- FIXED LEVEL = Uses the TV startup volume level as a fixed line level on the Headphone output.

- FOLLOW TV =   Follows the normal TV speaker volume setting on the Headphone output.
  NOTE: In most situations this will be the most suitable setting in a Hotel setup.
